MUSTAF HUSSAIN

Senior Full Stack Engineer | GoLang | MERN | AWS | Microservices
mustafhussaincse1@gmail.com | +918972427110 | linkedin.com/in/mustafhussain

Professional Summary

Senior Full Stack Engineer with 8+ years of experience designing scalable distributed systems and high-availability cloud-native applications using MERN stack, TypeScript, and AWS. Strong expertise in system design, microservices architecture, RESTful API development, event-driven systems, CI/CD automation, and infrastructure as code. Proven track record of leading cross-functional teams, optimizing production systems, and delivering high-performance backend services in Agile environments. Seeking senior engineering or technical leadership roles in product-driven organizations.

Skills

Programming Languages: JavaScript, GoLang, TypeScript, SQL.

Technologies & Tools: React JS, Redux, Node JS, Express JS, Fastify, PostgreSQL, TypeORM, Liquibase, MongoDB, Redis, RabbitMQ, SocketIO, Jest, AWS (EC2, S3, SQS, Lambda, ASG, API Gateway), Docker, HTML, CSS, Bootstrap, MaterialUI, Tailwind CSS, Grafana, Git, GitLab, CI/CD, Terraform.

AI tools: Gemini Code assist, ChatGPT.

Soft Skills: Analytical Thinking, Creativity, Communication Skills, Adaptability, Teamwork.

Work Experience and Project Work

Kaleyra Sep 2022 - Feb 2026

Software Engineer Specialist

- **Kaleyra Video :** Architected and scaled a distributed real-time video communication platform serving high concurrent users, improving call latency and system resilience.
- Refactored legacy monolithic backend into microservices, reducing RESTful API latency by 89% (180ms to 20ms), significantly enhancing performance and efficiency.
- Implemented comprehensive unit and end-to-end test coverage (85%+), significantly reducing production defects and improving release stability.
- Designed backend services handling 10K+ daily requests with 98% uptime by implementing structured logging, monitoring, and proactive alerting.
- Authored comprehensive technical documentation to improve system understanding and maintainability.
- Integrated AI voice models into production video platform, enhancing user engagement and expanding real-time voice capabilities.
- Technologies Used : JavaScript, ReactJS, React Hooks, Redux, NodeJS, TypeScript, Fastify, GoLang, gRPC, Jest, SocketIO, AWS(S3, Lambda, EKS, CloudWatch), Redis, RabbitMQ, Docker, PostgreSQL, TypeORM, Liquibase, MongoDB, Grafana, CI/CD, Git, GitLab, Miro, Jira, Confluence, DrawIO, WebSockets, REST APIs, RPC.

Cimpress Sep 2021 - Sep 2022

Senior Software Engineer

- **SAPI :** It is a fleet of distributed services that helps to order, track, update and cancel shipments.
- Designed and developed 6 production-grade microservices, reducing infrastructure costs by 32% and improving RESTful API throughput by 45%.
- Designed and deployed scalable shipment tracking services processing thousands of daily transactions, improving order processing efficiency by 60%.
- Mentored junior developers, guided and helped through code reviews and peer programming.
- Spearheaded CI/CD pipeline implementation using GitLab and Docker, reducing deployment time by 60% and enabling zero-downtime releases.
- Technologies Used : JavaScript, ReactJS, React Hooks, Redux, Redis, Tailwind CSS, NodeJS, Go Lang, gRPC, ExpressJS, TypeScript, Jest, AWS(ASG, Lambda, S3, Cloud Watch, EC2), Redis, MySQL, MongoDB, Docker, CI/CD, MaterialUI, Git, GitLab, Terraform, TDD, SOLID Principles, Microservices, REST APIs.

DataGrokr Analytics Apr 2019 - Sep 2021

Software Developer

- **QPC Migration :** Migrated a fleet of legacy applications of QPC from on-prem to AWS. Enhanced performance of the software suite. Created scalable infrastructure using AWS and deployment tools like Octopus.
- Led a cross-functional team of 6 developers, conducting code reviews and facilitating sprint planning. Actively contributed to team scaling by interviewing and onboarding new hires.
- Spearheaded the migration of on-premise infrastructure to AWS, architected a cost-efficient solution that reduced annual operational costs by 90%(1M USD to 100K USD), improved revenue by 60%.
- Worked in multiple projects as full stack developer and led a migration project.
- Technologies Used : JavaScript, ReactJS, Redux, NodeJS, Express, TypeScript, MongoDB, PostgreSQL, AWS, Docker, Octopus, Tailwind CSS, MaterialUI, Git, GitLab, Linux.

Ergode IT Services Feb 2018 - Apr 2019

Software Engineer

- **Reimbursement :** A portal for employees where they can create invoices for their reimbursements and can track progress.
- Developed and designed the Reimbursement portal from the ground up, handling full lifecycle development from database design to deployment. Additionally, engineered a custom employee rating system to streamline internal performance reviews.
- Technologies Used : ReactJS, Redux, NodeJS, ExpressJS, TypeScript, AWS, PostgreSQL, JavaScript, Bootstrap.

Key Achievements

- Reduced API latency by 89% through microservices migration.
- Cut infrastructure cost by 90% via AWS cloud optimization.
- Led a team of 6 engineers in large-scale cloud migration.
- Improved CI/CD pipeline reducing deployment time by 60%.
- Delivered scalable systems handling high-volume distributed traffic.

Education

Siliguri Institute of Technology Aug 2014 - Jun 2018

B.Tech in Computer Science and Engineering ***DGPA: 7.88/10***

Relevant Coursework : Object Oriented Programming, Relational Databases, Data Structures and Algorithms, Operating Systems, Computer Networks, Advanced Data Structures and Algorithms, Cloud Computing, Web Development.

Awards

- **Won the Grock Hackathon:** Interdepartmental hackathon. (Had to create a working prototype of car listing portal within two days)
